SUMMARY

AI/ML Engineer with 3+ years of experience building scalable machine learning and NLP systems using Python, FastAPI, Flask, and Django. Specialized in LLM-based applications, RAG pipelines, and vector databases (FAISS, ChromaDB). Proven expertise in designing production-ready AI solutions, optimizing data pipelines, and developing intelligent automation systems.

SKILLS

Languages: Python, SQL.

Frameworks: Flask, FastAPI, Django.

AI/ML: Machine Learning, LLMs, NLP, LangChain, LangGraph, Prompt Engineering.

Vector DB & Tools: FAISS, ChromaDB, Hugging Face, spaCy, YOLOv8, Roboflow, Docker, GIT.

PROJECTS

lamAutomation **Medical Information Extraction System** **Tech Stack: Python, OpenAI LLMs, spaCy, NLP, Multiprocessing**

- Built a platform independent NLP EXE leveraging OpenAI LLMs, spaCy, and custom NER to extract structured clinical and pharmaceutical data from unstructured medical research documents.
- Implemented Python multiprocessing for parallel text extraction and processing, significantly reducing response time and improving throughput for large-scale document batches.

DocumentReader **LLM-Powered Document Q&A System** **Tech Stack: Python, ChromaDB, OpenAI, Embeddings**

- Developed a document Q&A system using ChromaDB for semantic search and OpenAI LLMs for context-aware answers.
- Improved efficiency using vector embeddings and relevance scoring to reduce token usage and enhance accuracy.

SmartFarming **Leaf Disease & Deficiency Detection** **Tech Stack: YOLOv8, Roboflow, Flask, Computer Vision**

- Built a YOLOv8 + Roboflow computer vision API using Flask for real-time detection of diseases in cucumber leaves.
- Applied data augmentation and model fine-tuning; deployed as an EXE for smart agriculture platforms.

Sarjen BOT **Custom chatbot widget** **Tech Stack: JavaScript, APIs, NLP**

- Built a configurable JavaScript chatbot widget that integrates into existing systems without requiring code changes, enabling plug-and-play deployment.
- Implemented dynamic API orchestration, document-based Q&A, and custom middleware for role-based access control and secure query handling.

Triage - BOT **Medical Chatbot** **Tech Stack: LangGraph, LLMs, Python, APIs**

- Designed a LangGraph-based AI triage chatbot using OpenAI GPT models for intent detection and workflow automation.
- Implemented multi-turn slot filling, dynamic prompts, and API orchestration for symptom assessment and prioritization.

NEMO **Custom Chatbot Builder** **Tech Stack: Python, LangChain, ChromaDB, LLMs, APIs**

- Developed a modular chatbot builder enabling domain-specific conversational agents with reusable components.
- Implemented intent detection, slot extraction, and customizable pipelines with multi-API integration.

EDUCATION

8/2019 - 3/2023 **Adani Institute of Infrastructure Engineering** **B.E.**
Information and Communication Technology | CGPA: 8.0 / 10.0

EXPERIENCE

1/2026 – 4/2026 **Impero IT** **Softwere Developer (AI/ML)**

- Designed and developed LLM-based conversational AI systems for intent detection, workflow automation, and multi-turn dialogue management.
- Built scalable chatbot architectures with dynamic prompting, slot filling, and seamless REST API integrations for domain-specific solutions.

1/2023 – 1/2026 **SARJEN SYSTEMS PVT. LTD** **Python Developer ((AI Systems))**

- Engineered AI-powered systems for document processing, NLP-based information extraction, and automated data pipelines.
- Developed ETL workflows and optimized SQL queries to improve data processing efficiency and system performance.
